1) Two Powerful Tools You Can Use

There are **two tools** you can use to hide your affiliate link from your customer's eyes.

First, a link cloaker which able you to prevent your link being shown in the status bar of browser. You can access this tool by clicking the link pointed by RED arrow.

Second, a link redirection tool. Access the tool from the link pointed by BLUE arrow.

With this tool, you can generate an "index.html" page that redirect people to your affiliate link. You can put this *index.html* file at your root directory of your domain so you can have something like:

www.BuyThisProduct.com

redirecting to your affiliate link.

Or, if you put the *index.html* into sub-directories then you can have URLs like these redirecting visitors to your affiliate links:

www.BuyThis.com/product1
www.BuyThis.com/product2

2) Redirecting To Affiliate Link

After clicking the menu, you will find a screen like above. There are 5 simple steps you need to follow:

1. Enter your URL
2. Enter your TITLE text for the URL
3. Choose your redirection method. If you want the browser to maintain the address location as your domain name, then choose the first option.

Otherwise, if you want the address location as your affiliate link original domain name, then choose the second option.

4. Click to download your "index.html" file.
5. Upload the file to your root directory or sub-directory using your favorite FTP program.

I'm using FileZilla to upload files to my server. You can download the program for FREE [here](#).

Usually, your root directory will have this name: *public_html*

See an example below.

A screenshot of a Linux file manager window displaying a directory listing. The window has a title bar and navigation buttons. The main area shows a table of files and directories. The 'public_html' folder is circled in red. The status bar at the bottom indicates '11 files and 13 directories. Total size: 30,793 bytes'.

Filename	Filesize	Filetype	Last modified	Permissions
.ssh		File Folder	9/8/2008 7:09:...	drwx-----
.trash		File Folder	5/25/2008 5:50...	drwx-----
access-logs		File Folder	5/24/2008 9:58...	lrwxrwxrwx
etc		File Folder	8/28/2008 9:44...	drwxr-x---
mail		File Folder	9/25/2008 3:30...	drwxrwx---
public_html		File Folder	6/16/2008 3:23...	drwxr-x---
tmp		File Folder	9/25/2008 3:32...	drwxr-xr-x
